CANAL POINT, PALM BEACH COUNTY, FLORIDA, FRIDAY, MARCH 22, 1929

\$2.50 A YEAR

## RAILROAD EXTENDED AS STUCK STARTS

### LOCOMOTIVES OF TWO LINES NEAR TO ONE ANOTHER

Will Be Within Whistling Distance In the Coming Week

FLORIDA EAST COAST, ATLANTIC COAST LINE

Crews Work From South Bay and Miami Canal To Meet Soon

There will be no celebration of the event—no "driving of the golden spike" or anything of that sort, because the residents of the upper Glades are too busy marketing their crops of green beans and preparing to pick tomatoes, but before the end of March a thing of tremendous importance to this region will take place.

The Florida East Coast railroad rails have been carried across Hillsboro canal at Belle Glade-Chosen and are nearing North New River canal at South Bay; the Atlantic Coast Line rails have been extended from Clewiston in Hendry county, on the south, west side of Lake Okechobee, to Miami canal in Palm Beach county, and within two weeks the locomotives of these two great railwhistling systems will be within whistling distance of one another.

The Florida East Coast track-laying crew is due to reach South Bay "steel" tomorrow or Sunday, and from South Bay to Miami canal, a distance of ten miles, track will be laid at the rate of half a mile a day.

When that is accomplished, Lake Okechobee will be almost entirely cut in two, and a mental picture drawn by exuberant boosters of the Everglades 25 years ago will materialize. The Florida East Coast's "Okechobee extension" starts at Okechobee, 30 miles north of Canal Point, and goes on to Pahokee 4 miles away, and to Belle Glade-Chosen, 11 miles more, and to South Bay, 4 miles west and ends with the 10 miles at Miami canal, a total length of about 65 miles. The A. C. L. has 8 miles of new track between Miami canal and Clewiston. Moore Haven is 15 miles; thus the A. C. L.'s 23 miles of track adds to the F. E. C.'s 65 to give a total of around 88 miles of railroad between Okechobee and Moore Haven by way of the eastern and southern and southwestern shores of Lake Okechobee.

Extension of the Florida East Coast's Okechobee extension from the south end of the lake to the main line at Fort Lauderdale is foreseen as inevitable, a conviction strengthened by the fact that construction to Miami was planned and carried out four years ago. When the F. E. C. is extended from the south end of the lake to a connection with its main line on the east coast, the running of A. C. L. through trains into Miami is expected to follow. And when Miami's hundreds of thousands of winter tourists can ride the 90 miles to Lake Okechobee, a round trip excursion will be a reality.

### Says Lobby May Kill Flood Control Plan

Stating that if effort is made to secure the federal government to stand the entire expense of Everglades flood control, and to consider the subjects of flood control and navigation as two separate subjects, legislation will result. Senator Duncan U. Fletcher has written to R. E. Kurtz, of Fort Myers, who forwarded a copy of the letter to U. S. Commissioner George O. Butler, of West Palm Beach.

Political lobbying to secure the desired legislation to aid the glades area was branded "absurd" by the senator who insisted in the letter that "assistance upon it may defeat any proposed legislation. This is not a party question. This is not a political question, nor one to be influenced by politics."

### DO NOT ACCEPT FLETCHER'S VIEW

Senator Is Misinformed, Says Flood Control Association Officer

WEST PALM BEACH, March 20.—A letter detailing plans of the Florida Flood Control Association to be un-sound and doomed to failure, written by Senator Duncan U. Fletcher to R. E. Kurtz of Fort Myers, who is second vice president of the association, struck fire Wednesday when "called to the attention" of the organization's members.

The association appointed Jules M. Burguiere, of West Palm Beach, and P. Thomas, of Okechobee City, to confer with Governor Carlton at Tallahassee and tender the executive the association's assistance in working out whatever program he sees fit to recommend to the legislature in connection with resolutions to the national congress calling for flood control.

Mr. Burguiere and Mr. Tomaselli will confer, the association's full committee will place at Governor Carlton's disposal all data collected by the body bearing on the situation, it was said.

William Griffith, publisher of the Okechobee News, secretary of the Florida Flood Control Association, refused to issue a statement regarding Senator Fletcher's letter, but "unofficially" declared the letter "misinformed."

Commenting on a passage of the senator's letter which reads: "The Florida Control Association has adopted a policy excluding navigation from any flood-control project," Mr. Griffith said, "The Florida Flood Control Association has approved by one policy, that of approving the report made by General Hadwin on flood control in the Everglades area. Mr. Griffith declared that the association believes the federal government should bear the entire cost of any flood-control project.

### People and Country Came Back; Lake Region Population Increased

The upper Everglades section of Palm Beach county has more population now than it ever had, despite the reduction in population by the draining of nearly 400 persons in the flood last year. There is a house or a tent on practically every town lot and building site on which there was a dwelling a year ago. There are hundreds of additional homes and tents.

Every community in this section has more people in it than it ever had; there are more people in the Canal Point district in the Pahokee district and the Belle Glade-South Bay district than there were a year ago, and by all reports there are as many inhabitants in the Chosen district and in the country around Miami canal.

Road and highway construction crews and canal-planning crews are fully manned and the surprising, by big farm crop called for more pickers than were ever in the territory before. Tents and shacks are being built, and even light aircraft are spotted over night, as sites are being located.

### HURRY HOUSES TO PACK TOMATOES

Want State To Take Belle Glade Road

Notices printed this week state that bills will be offered for introduction in the legislature to have the State Road, Department take over the road from Canal Point to Belle Glade by way of Pahokee and to have the Pahokee-Belle Glade road required from state funds as emergency money.

The notices of intention to apply for this special and local legislation were filed by J. H. Robbins, who is the attorney for the board of county commissioners.

There is widespread sentiment for this legislation, and it is believed that the legislature will pass it. The purpose of the legislation is to have the State Road, Department take over the road from Canal Point to Belle Glade by way of Pahokee and to have the Pahokee-Belle Glade road required from state funds as emergency money.

With the opening of the tomato shipping season less than a month away and with the prospect of good yields and good prices, there is a scurrying to get packing houses ready. Several packing houses were destroyed by the hurricane in September of last year and these will have to be rebuilt or replaced with houses in new locations and in addition there will have to be others.

There will be at least two tomato packing houses at Sand Cut siding, three miles north of Canal Point, from which locality the first car shipments will be made. C. S. Moore will operate the packing house in the old machine shop on the lake front on the Canal Point-Pahokee line, and L. L. Stuckey will operate the other, which will be rebuilt his house there.

Packing houses will be required at stations O. B. 301 and 304 south of Pahokee and elsewhere in the 11 miles of country between Pahokee and Belle Glade-Chosen. There will be at least three packing houses at the latter place. The rails of the Florida East Coast will be at South Bay by the first of April and space will be allotted there on the railroad right of way for as many houses as are needed, and the F. E. C. will have a loading station at Miami Canal, 10 miles west of South Bay.

### AS LAKE STOOD THEN AND NOW

The lake is at around 15-12 feet, by which the residents and the other initiators understand that the surface of the water in Lake Okechobee is at about 15-12 feet above sea level.

"What's the price of beans today?" that is the question most often asked by the mover-skippers in that frequency of inquiry is, "How's the lake?" and the answer is given in the preceding paragraph.

"What was the lake at this time last year?" that question usually follows the first inquiry, and in discharge of its obligations to recorders The Everglades News has reported that according to the records of the U. S. Department of Agriculture's cane testing station, Lake Okechobee stood at an elevation of 15.0 feet on March 21, 1928.

The lake was at low stage this time last year, and it is hard to find had been as much rain as usual in the preceding rainy season. The lake level was 15.0 feet on March 21, 1927 as gauged at the cane testing station was 36.25 inches, which was considerably below average.

The level of the lake depends on how much water comes in and how much is let out; it is like a bathtub. When the water is let out, it is a matter of degrees, and in the case of the lake, it is a matter of degrees.

There never has been as much water out of the lake as there has been in. When the lake is high it is because it was made to be high.

There is widespread sentiment for this legislation, and it is believed that the legislature will pass it. The purpose of the legislation is to have the State Road, Department take over the road from Canal Point to Belle Glade by way of Pahokee and to have the Pahokee-Belle Glade road required from state funds as emergency money.

There is widespread sentiment for this legislation, and it is believed that the legislature will pass it. The purpose of the legislation is to have the State Road, Department take over the road from Canal Point to Belle Glade by way of Pahokee and to have the Pahokee-Belle Glade road required from state funds as emergency money.

### SEEKING METHOD TO GET RID OF HIGHWAY TOLLS

Residents of Upper Glades Anxious For Definite Action Now

SPECIAL DISTRICT PLAN NOT FAVORED

Suggest Lease, With Rental To Apply When Road Is Bought

Creation of a tri-county special road district to buy Conners Highway and open the road to free use by the general public and then sell the road to the state is not a practical plan and is not supported by public sentiment, it appears from "letters" put out by the Chamber of Commerce of Canal Point, which is taking the initiative in a campaign to free this section of the state from the burden of a toll road.

Nothing short of purchase of the road through the State Road Department will meet the demands of the public sentiment which favors the opening of the toll road to public use.

Had the State Road Department made up its budget for the present year and allotted all of the funds for the disposal of the road, the State Road Department could not have disposed of the road.

The legislature can provide relief for the State Road Department and direct the expenditure of the money, but the money cannot be collected as taxes, and the State Road Department cannot collect the money.

Having suffered a toll road for five years, the residents of the upper Glades are anxious to get rid of the toll road. The toll road is a burden to the residents of the upper Glades, and they are anxious to get rid of it.

There is widespread sentiment for this legislation, and it is believed that the legislature will pass it. The purpose of the legislation is to have the State Road, Department take over the road from Canal Point to Belle Glade by way of Pahokee and to have the Pahokee-Belle Glade road required from state funds as emergency money.

### WATER LEVELS

Canal Point, March 22. Lake Okechobee, 15.4 feet. W. P. B. Canal, 14.3 feet.

Can't Count On Canal, Need Low Lake Level

St. Lucie canal, main outlet to Lake Okechobee, is in bad condition, a civil engineer employed by a company that has large interests in the Everglades found when he made an inspection of it recently.

The canal's banks will wash and sand bars will form as they have formed before the rains fall. St. Lucie canal territory as rates normally fall in that area and the canal will become clogged and plugged.

It is generally understood that more than six million dollars of Everglades taxpayers' money has been spent on St. Lucie canal and it is not completed and it provides no assurance of a canal to control the lake in time of stress.

The conclusion of the civil engineer was that the canal recently was at such a low level as to build levees anywhere around Lake Okechobee until outlets from the lake had been cut away.

With more population in the lake region now than ever before and St. Lucie canal not in condition to assure its functioning, a low lake level is the only assurance against a worse disaster than any heretofore.

There is widespread sentiment for this legislation, and it is believed that the legislature will pass it. The purpose of the legislation is to have the State Road, Department take over the road from Canal Point to Belle Glade by way of Pahokee and to have the Pahokee-Belle Glade road required from state funds as emergency money.

There is widespread sentiment for this legislation, and it is believed that the legislature will pass it. ### CLEWISTON AREA HAS 2000 ACRES OF TOMATOES

Railroad Estimates Movement of 450 Cars From That District

BEANS TO BE GONE BY FIRST OF APRIL

Planting of Corn To Follow; Shipping Squash and Digging Potatoes

By J. E. Beardsley. CLEWISTON, March 20.—(Special)—The first car of the movement of the spring crop from Clewiston was on Feb. 20 and eight cars were loaded to March 1st, three peas, balance beans.

From 1st to 20th of this month 11 cars were loaded, mostly beans, some mixed peas and squash.

The car lot movement from Miami Canal Lock since March 10 amounts to 16 cars with two loading on track 9 date, all beans with one exception. All cars rolled to New York with some Chicago.

For February, about 1, packages express, most beans, some peas. Since March 1st, around 3,000 express including beans, peas, squash and first tomatoes of the 1929 season, consignments covering a wide range of Ohio river, eastern and southern markets.

The first tomatoes, 50 crates were grown by E. L. Vickers of Bare Beach and shipped by W. C. Hooker on the 16th, quality was excellent.

The Atlantic Coast Line anticipates 300 cars from Miami Lock and 150 cars from Clewiston in the balance of the season to June 1st.

Shipments from the lock will originate, first to South Bay and on islands, Clewiston will handle Rita, Bare Beach and local.

The Southern Sugar Company, C. A. Jackson, agricultural, starts digging next week 30 cars of Red Bliss and Cobler potatoes, finest ever seen in this section, from fields adjacent to Nine-Mile canal, where the moisture content has been right through water control.

General crop conditions are unfavorable, principally due to continued dry weather and constant winds of the past three weeks. Most of the beans are not first quality, due to wind-scare and drought, and the prices received are showing a very small margin over harvesting expense.

On basis of present prices, the crop will be picked and cleaned up about the first of April.

Tomato acreage is the largest since the spring of 1924.

M. U. Mounts, assistant county agent, met with his Boys' Club in Pahokee Wednesday. Mrs. Morgan, home demonstration agent, and Miss Lyle also visited Pahokee and met with the 4-H club. Postmaster George McLarty made a trip to West Palm Beach, Wednesday where his wife is visiting Mrs. B. Robinson.

C. L. McFarlin, Ford representative from Jacksonville, called at Pahokee Wednesday to see the Ford dealers, Elliott & Robison.

The annual meeting of the Pioneer Penny Ante Poker Club was held Tuesday evening in Pahokee. It is reported to have been a very exclusive affair. Refreshments were served and entertainment continued until a late hour.

The best news of the week is that every body is busy picking beans and wigs them and cashing to go to attend anything else. The form at the Bank of Pahokee is to cash checks, you change to pay off laborers.

## Pahokee Farmers Aid Flood Victims

WASHINGTON, March 19 (A.P.)—The Red Cross has found its problem of feeding southern flood victims partially solved by grateful beneficiaries of its last big relief project—that of rehabilitating victims of the Florida hurricane of last fall.

A telegram from "the farmers of Pahokee, Fla.," informed national officials that two carloads of carrots, beans and onions are en route to the Montgomery, Ala., relief headquarters. The message said the farmers, banded together out of gratitude for the assistance given by the Red Cross after 1,800 persons were drowned in the region of Lake Okeechobee last September.

## VANNAH TELLS OF GLADES FARMING

Brown Company Chemist Addresses Rotary Club At County Seat

WEST PALM BEACH, March 20.—Agricultural possibilities beyond imagination of the layman, but backed by the unquestionable authority of five years scientific research and five years actual production were sketched for members of the Rotary club Tuesday by H. P. Vannah, chief chemist of the Brown company.

Without superfluous oratory, but with a firm basis of fact, Mr. Vannah astounded his hearers with some of the statements of progress on the Brown peanut plantation along the Hillsboro canal. George F. Bense, himself an Everglades expert, in introducing Mr. Vannah, pointed out that the Brown company, with 70,000 acres of the glades land, 1,800 under cultivation, had been conducting scientific experiments over a period of five years. They have no land or stock for sale, he explained.

During the course of the company's experiments it has been proved that 32 staple crops, equal or better in production than the best parts of the country can be grown in the Everglades. Mr. Vannah also stated that he had shown that the Everglades of which the major area was swampy land, is perfectly capable of feeding 12,000,000 men for a year, giving them a working ration of 3500 calories per day.

"At this time a great deal of attention is being paid to the question of flood control of the Everglades through the medium of Federal aid. If we who are interested in the development of the state and the glades in particular can demonstrate to those charged with the granting or denying of monetary assistance, the undertaking that the proposed expenditures are justified, it will be our ultimate benefit," Mr. Vannah said.

"I consider it equally important that those who are immediate adjacent to the glades be aware of the conditions as they exist and be prepared to act on my topic, 'The Value of the Everglades as an Agricultural Asset.'"

He stated that the Brown company is now using 1,800 acres for peanut growth and plans to expand to 30,000 acres on provision of improved water control. The truck industry is using a possible 11,000 acres. "An illustration of the production under the yet uncertain water control is seen in the weekly flooding of 231 cars of truck crops in the week ending May 23, 1934, from the south and southern sides of the lake."

The general characteristics of the Everglades are those of location and nature of the area, composition of soil toward high plant productivity, and that of the results of the use of labor and material of modern science in solving the local problem.

Regarding location and nature of soil it is submitted that the Everglades is located in a climate and geographic sub-tropical zone favorable to healthy year-round agricultural operations, to continuous crop production and to the use of water area that is of a deep deposit of peat.

encumbered by rocks or trees, available in large fields and adapted to machine methods on a large scale.

After discussing the composition of the soil he said, "In the Everglades the nitrogen is a great natural asset. Scientific studies of this area indicate the presence of excesses rather than existence of deficiencies in the natural state of the soil and as a result there has been developed a system of agriculture where whereby there are used salts of potassium, calcium, magnesium, aluminum and lead to release the latent fertility of the soil."

He exhibited a plan of the company's present production layout showing lateral ditches every one-eighth mile, flowing into the Hillsboro canal, the longest of which is three miles. This secondary drainage plan asks only that the main canal levels be not permitted to overflow their natural banks. He also demonstrated the plan of fertilization which has been successfully conducted in areas extending up to a total of 700 acres for potatoes in 24 acre fields, three miles in length. "Controlled extensive records of physical, chemical and climatic characteristics of the Everglades soil show that peanuts grow here with as good oil content as occurs on any other soil, that sugar cane grows here the year round and without irrigation, that citrus fruits, truck crops grow here in abundance when all other areas are sealed against use by winter weather and that hay is produced with high nitrogen content without use of fertilizers."

Today sugar cane is being planted at the rate of 100 acres per day, he said, peanuts field may be expanded at the rate of 480 acres per day, and the conclusion exists that the only way to preserve this agricultural asset is to use it, else it will be destroyed by fire in idle ownership.

The list of crops that have been grown successfully at Shawano includes peanuts, cabbage, celery, persimmons, squash, okra, spinach, cauliflower, sugar cane, mint, buckwheat, chickpeas, cotton, tomatoes, potatoes, carrots, tomatoes, beans, beets, lettuce, tobacco, corn, sorghum, sunflowers, eggplant, daffodils, rice, sweet potatoes and horseradish, Mr. Vannah said.

## For Lower Taxes Drainage Districts

The bill sponsored by the National Drainage Association to give relief to farmers on lands in drainage districts has been re-introduced. It was introduced in the House by Congressman Driver, March 2 and referred to the committee on irrigation and drainage.

The purpose of the bill is to afford tax relief for every farmer on drained land who still has payments to make for the cost of his drainage system or levee protection. The bill is subject to change to meet the needs of the several communities and interests.

Persons who are interested should write to W. H. Dick, president of the National Drainage Association, Bank of Commerce Building, Memphis, Tenn.

The bill in full follows: A bill to provide for the aiding of farmers on wet lands in any state by the making of loans to drainage districts.

age districts, levee districts, levee and drainage districts, counties, boards of supervisors, and other political subdivisions and legal entities, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of aiding the farmers in any state on the wet lands which have been drained by artificial means and or protected from the flood waters of a stream or streams by means of levees or other improvements, duly organized as drainage districts, levee districts, and or levee and drainage districts and existing under and by virtue of the laws of the State where located and counties, boards of supervisors, and or other political subdivisions and legal entities in such state by virtue of the laws thereof, where for the payment of such drainage and or flood control works there are now outstanding bonds, mortgages, or warrants, the secretary of the interior is authorized to loan, out of the revolving fund hereinafter created, to any such district or legal entity an amount sufficient to redeem such bonds, mortgages, warrants, and the accrued interest thereon, in the manner and under such restrictions and conditions as are hereinafter set forth.

Sec. 2. Loans shall be made only to the legally constituted authority which has issued the bonds, mortgages, or warrants, and not unto it the secretary of the interior has satisfied himself by such examination of the engineering works, for which the legal obligations were issued, as he may deem necessary, of the reasonably successful operation thereof, and the lands designed to be protected by these works are receiving protection to a reasonable degree.

The secretary of the interior shall make such examination of the economic conditions of such legal entities as he may deem necessary to satisfy himself that the security for the loan is adequate, and no loan shall be made until he is satisfied that the loan will be paid at maturity.

Sec. 3. Loans shall be non-interest bearing and shall be made for a period not exceeding four years, and the secretary of the interior shall fix the exact time in every case.

Loans shall be secured by the issuance and delivery to the secretary of the treasury

by the legally constituted authority, serially redeeming bonds payable to the United States in the amount of the loan, and it shall be and appear on the face of each bond that it is a first lien on the lands within said district and or legal entity on which the original obligations were issued, and the secretary of the interior shall fix the dates of the maturities of said bonds.

Loans may be made annual or to take up the principal of and accrued interest, on the legal obligations aforesaid provided whenever the legal obligations may be paid on call or by agreement with the holders thereof the secretary of the interior may loan a sum sufficient to take up such portion or all of the total issue and accrued interest as he may deem necessary to afford the relief provided for in this Act.

Sec. 4. There is authorized to be appropriated, out of any money in the treasury not otherwise appropriated, the sum of \$180,000,000, or so much thereof as may be necessary, which amount shall be a revolving fund for the purpose of making loans under the provisions of this Act: Provided, however, that the amount appropriated in any one year shall not exceed \$10,000,000, but shall be in such amounts as shall be recommended by the secretary of the interior, and when appropriated shall be deposited by the secretary of the treasury in this fund.

Sec. 5. The secretary of the interior shall make all reasonable and necessary regulations for carrying into effect the purposes of this act, and the actual expenses connected therewith shall be paid out of the moneys provided hereunder.

### CANAL POINT

The high school is putting on the play, "Deacon Dubbs," under the direction of Miss Mary Young. They expect, if nothing happens, to give it Friday night, March 29, at the Pahoehoe auditorium. This is a very amusing comedy, and we feel sure it will be enjoyable. It is for the benefit of the Athletic Association and the admission is only 35 and 50 cents.

The cast is as follows:  
Deacon Dubbs — Devane Latimore.  
Philopene Popover — Ina Mae Smith.

Rose Raleigh—Vera Todd, Armas Coleman—Thurmond Knight.  
Emily Dale — Elizabeth Lowe.

R a w d o n C r a w l y — L a v o u g h K n i g h t.  
Deuteronomy — Walton Brazz.  
Yennie Yensen—Eva Erickson.

Auctioneer—Ottis Vinson.  
Trixie (little sister)—Mary Baker.

**Flag Contest.**  
Mr. Speer received a letter from Washington the day telling us about a flag essay contest. The essay is to contain from 500 to 1,000 words on the history of the flag and several of us entered it—Oretha Thompson, Wenonah Segler, Ottis Vinson, Julia Geiger, T. A. Bass, Lavough Knight and Ina Mae Smith.

Pupils from 14 to 18 years old are eligible.

The states are divided into regions and there is a national prize and a regional prize.

The national prize is a trip around the world; regional prize a trip to Washington and historical points of interest near. The third prize is \$200 on a college education.

**The Eggs Hatched.**  
The agriculture class, including Irma Tidwell, Eva Erickson, Carolyn Mock and Ina Mae Smith, together with Mr. Langford and Mr. Gilbert, set 117 eggs about three weeks ago. Before the eggs hatched Ina Mae forgot to turn her eggs until noon one day. Mr. Speer found it out and said, "Ina Mae, I don't expect that helps your eggs very much." So one night after that, Mr. Speer sent

Maec out to turn the eggs and the lamp blew out and the eggs got cold. Next day Mr. Speer told Ina Mae about it so Ina Mae said, "Mr. Speer, I don't expect that helps your eggs very much." And so the joke was on Prof., but despite all that they had good luck since 109 of the eggs hatched.

**And Now Tennis.**  
Now that the basket ball season is closed the girls had taken up tennis, although most of the girls can't play much. Miss Young is teaching them, and lending them their tennis belt. There has been some talk of a tennis club but the girls haven't quite decided about it yet.

The ninth and tenth grades have ordered two pictures and are having them framed for the home room. The pictures were paid for out of the home room dues. The names of the pictures are "The Lake," by Carol and "Stratford on Avon," Shakespeare's home.

The pictures are in colors and add a great deal to the appearance of the room.

Mr. Speer has also given the ninth and tenth grade room two potted cacti, to help decorate it.

**New Bus Schedule.**  
The bus schedule has been changed so that the pupils who had to leave home in the morning by about 7:45, which caused them to get to school by about 8 o'clock, now leave home about 8:20 and get to school at 8:50. Also the teachers who had to be on yard duty until 4:30 are relieved of that by the busses leaving directly after school.

**Girls Won Prize.**  
Elizabeth and Vernet Stuckey were chosen from the Canal Point 4-H Club to demonstrate the county fair, Saturday, March 9. They demonstrated the correct food to eat and the proper setting of a luncheon table. They won first prize and a trip to campus the summer. They consider themselves very lucky.

The seventh and eighth grade had weiner roast Friday night at St. Lucie Lodge. The following members of the faculty attended: Mr. and Mrs. J. V. Revels, Misses Onida Trappell, Ann Curtiss and Elizabeth Williams. Games were played after which each roasted "weenies." All present had a very good time.

### Why Many Readers, Advertising Pull

When Wm. G. Booth of Vero Beach wrote to the Florida State Chamber of Commerce at Jacksonville for information "as to land agricultural and industrial conditions and localities existing in the Everglades," he received a reply in which all the publications which contain information concerning the Everglades, the Canal Point newspaper outstanding. The publisher, Robert Howard Sharp, is one of the best posted men in Florida on this subject and this paper carries everything about the others listed, and then some. We depend largely upon The News to keep informed as to developments in the Glades.

It is the practice of bankers, commission officials and many other persons to refer inquiries for information about the Everglades to "the Canal Point newspaper." This common practice explains why the circulation of The Everglades News is large and why advertising in this paper brings response from readers.

### CALLERS

J. E. Chestnut, who has been long known at Belle Glade, was in town Wednesday with his brother G. H. and they looked in on us, they too being long known at the Glades. Signs on the printing office building which reminded them of the present office of the newspaper here. J. E. March 21. That detailed preliminary plans for establishment of a vegetable canning factory at the port of Palm Beach may be received within the next few days by the Lake Worth inlet commission was disclosed at the meeting of the commission this morning.

Request for information on the other facilities for location of the plant can be made available at the port terminals has been made to A. S. Anderson, chairman of the commission, by R. W. Apté, local business man, the inlet commission chairman announced. Anderson said that he assured Apté of the complete co-operation of the board on any enterprise that would be for the best interests of the port and requested that complete details of the plan be submitted in writing.

That there is a great field for the canning industry in this section was brought out by Anderson with the statement that seven canning factories are now running full blast at Miami. It was also brought out at the meeting that the Merchants and Miners Transportation company, which also serves the Port of Palm Beach, handled approximately 70,000 cases of canned goods, products of Miami canning factories, in vessels calling from Miami last week alone.

**NO SOCIAL NEWS.**  
There is no social news from East Beach this week, as most everybody is busy picking beans, hauling and selling, and this condition will continue until tomatoes are out.

**STILL PLANTING CANE.**  
Planting of cane is being carried on by the Southern Sugar Company on schedule at all points. Seed is being brought to Canal Point from Clewiston.

**BEAN PRICES.**  
Bean prices are showing a small but steady increase as the production and shipments decline in this territory and elsewhere. The range of prices is wide because of the different requirements of buyers and the territories they buy for or consign to and because of the differences in varieties and conditions.

**S. R. D. AND HIGHWAY.**  
President Paul C. Filly of the Canal Point Chamber of Commerce has asked the State Road Department to make an estimate of the value of Conners Highway in order that the legislature have information. The request was made that the request would be taken up at the next meeting of the State Road Department.

"Slim" Hayes, who was lost to view while working on a dredge, was in sight for a few days this week but he is gone again, and Tom Moody also is missing. It is suspected they have gone back to work somewhere.

### M. E. CHURCH NOTES

Sunday school, 9:45 a. m. and at Tyler's at 2:30 p. m.  
Prayer meeting, Wednesday, 7:30 p. m.

The sacrament of baptism will be administered after Sunday school session at Tyler's on Palm Sunday, the Easter Sunday there will be received into membership those desiring to join by baptism, confession of faith or by transfer. If you have no church home, we invite you to worship with us.

Bishop Ketter, recently assigned to this area, in company with our district superintendent, Dr. Garth and Mr. Kenne from Miami, will be paid a visit Monday of this week, the occasion being the fourth quarterly conference of the year.

A representative and appreciative audience greeted the distinguished visitors. Most lunch they left for Belle Glade and South Bay. The address of the bishop was enjoyed by all present.

The following members and friends have thus far generously responded to our appeal for an Easter offering for church benevolence: Mr. and Mrs. Brackett, Mr. and Mrs. Bachmann, Mr. and Mrs. Randolph, Mr. and Mrs. Marsh, Mr. and Mrs. Gooding, Mr. Cutting, Mr. and Mrs. McCallum, Mr. and Mrs. Jones, and Mrs. Garth.

### ROSS WINNE'S HOUSE

From its present appearance, Ross Winne's residence on the lake front road will be the finest house in Canal Point. It is to be steuccoed.

### WEATHER FORECAST

The forecasts for weather indicate for the week a continuance of the past week's light winds and occasional showers.

### PRINTING FOR PACKERS

The Everglades News is prepared to take care of the requirements of managers of packing houses for printed matter. Knowing what is department has procured used by the packing houses, paper and cardboard has been ordered and the mechanical ly.

### SAVE YOUR BEANS

Now is the time to make money by canning your beans and other vegetables while the market is off. See our home can sealer. Canning is a pleasure also a profit with it.

### INSECTICIDES

D 20 and D 6 copper lime dust for your Peppers, Eggplants and Tomatoes. A 1 Nicotine, Black Leaf 40, Red Arrow and Tobacco Dust for all plant sucking insects.

Buckeye Incubators and Brooders; also a good line of Poultry Remedies and Supplies.

# NEWS OF FARMS AND INDUSTRIES

## ENLARGING SUGAR MILL

CLEWISTON, March 22.—Concrete footings have been poured and work is under way to enlarge the 1,500-ton a day sugar mill of the Southern Sugar Company at Clewiston and increase the daily acre grinding from 1,500 to 4,000 tons by December of this year, it was announced here by William G. Ames, consulting engineer for the Southern Sugar Company, who supervised the construction of the first Clewiston unit and who is in charge of the extension work.

The expansion of the Clewiston mill facilities, it was explained, is in accordance with the expansion program announced by B. G. Dahlberg, president of the Southern Sugar Company, which calls for three mills in the northern Everglades with a daily capacity of 30,000 tons of cane per day.

With this, expansion program in view a year ago, the present 1,500-ton a day mill was so constructed to permit enlargement, and nine more mill rolls will be added to the present milling unit without enlarging that end of the factory.

Enlargement of the mill to more than twice its present capacity will necessitate the installing of considerable machinery in the fabrication end, where the sugar juice is purified and boiled, and because of this it is necessary to extend the factory building to the east for which the concrete footings have been poured.

Operating by P. G. Bishop, as operating vice president of the sugar company, Mr. Ames left this week for New York, where with E. G. Dahlberg, president, they will purchase the additional equipment necessary for the extension work.

## COTTON GROWING

A booklet on cotton growing in South Florida has been issued by the South Florida Cotton Growers' Association in which there is interesting information. Copies of the booklet can be had free on application.

## CLEWISTON AREA HAS 2,000 ACRES OF TOMATOES

Continued from Page One

but many plants already are lost through dry weather and the bulk of the crop is late due to interference by road work with farming operations. Much land being inaccessible for this spring planting, the estimate of the land set to tomatoes is 2,000 acres, Clewiston to Miami Lock inclusive, which will make about 60 per cent of a normal crop unless helped by rains such as that which fell over the territory last night. The rain last night averaged one inch.

Squash, especially Italian, is making an excellent crop; about 2,000 crates are to be shipped in the next three weeks.

Potatoes are doing well; the other fields will not approach the probable yield of Jackson, whose 30 acres of Red Bliss will make 15 cars.

Some green corn will move about the first of April by express to southern markets.

Scant returns on beans and uncertain future of tomato crop make it look like a hard summer for farmers in this section and most are not in position to plant summer cover crops through rearing the need. Much land will go into corn in the next month.

The Clewiston Packing Company, W. C. Hooker, president, is pouring foundations for a packing house at Sugarland highway and industrial canal, and W. S. Harvel, seedman, will erect a store and packing house in the near future. At least two packing houses are contemplated at Miami Lock and small one will be operated at Ritz.

## CLOSER SPACING IS SUCCESS IN PEANUT GROWING

Florida farmers who grow peanuts will have much better chances of increasing their yields by closer spacing than by applying fertilizer to the

crop, is the belief of W. E. Stokes, agronomist of the Florida Experiment Station. Very little profit has been returned from the use of fertilizer on peanuts in Florida, states Mr. Stokes.

In a recent radio talk over WRUF Mr. Stokes reviewed the results of fertilizer experiments on peanuts conducted by experiment stations in nearby states, and in nearly every instance it was found that very little or no profit was made by the use of fertilizer. In a few cases slight increases were secured by the addition of 300 pounds of superphosphate per acre.

We have gotten larger yields from close spacing of peanuts than we have from any fertilizer, line or land plaster treatment yet tried, says Mr. Stokes. By closer spacing he means that Spanish peanuts should be planted in rows not over 2 or 2 1/2 feet wide and 3 to 6 inches in the drill. Runner peanuts if planted should be in 2 1/2 foot rows, and 6 to 12 inches in the drill, he concluded.

## Growing Seed Beans In North Florida

Growers don't like high priced bean seed and low prices for the crop, they say. One of the reasons for the price of green beans high they try to make the price of seed low. The seed of beans will grow six acres of seed beans at Marumia and six acres at Monticello. Mr. Marumia, who lives north of Monticello, is doing in financing a crop of seed beans in Arkansas. Another Canal Point man is financing the planting of beans on the east coast that will be grown for seed. Bountiful and Strimling for the varieties that are chiefly being grown for seed, with some Black Valentine. There will be plenty of muck-grown Refugee seed.

## MOVEMENT OF MEXICAN VEGETABLES

Shipments of Mexican west coast vegetables into the United States during the month of February amounted to 29,488,000 pounds as compared with 18,737,000 pounds during February, 1928, according to a report received in the Foreign Service of the Bureau of Agricultural Economics from Consul Henry C. A. Damm at Nogales. This brings total shipments to the American market from the opening of the season on November 20, 1928, to February 28, 1929 up to 61,871,000 pounds as against 40,556,000 pounds during the corresponding period last season. In addition to these shipments, there were shipped in bond via the United States to Canada during the months of January and February 187 cars of tomatoes and 7 cars of green peas.

The revolution which broke out in Mexico on March 3 is interfering seriously with the shipments of fresh vegetables, states Consul Damm. The great bulk of the tomato crop is grown in Sinaloa and there is no way of getting them out by rail. Many railway bridges have been destroyed in southern Sonora and northern Sinaloa and it will take some time to make the necessary repairs before shipments on any appreciable scale can come through. Moreover, it is doubtful whether the railroad will send refrigerator cars into Mexico while the political disturbances continue. The last large shipment of fresh vegetables, consisting of 54 cars, came to the border at Nogales and was crossed into the United States just when the revolution began, states Consul Damm. From that time to the date of the report, March 7, the only additional cars to come through were those which were already on the rails in Sonora on March 7. In general, the situation is not discouraging and growers and shippers are sure to suffer heavy losses, states the consul.

## LETTERS FROM READERS

Flemingburg, Ky., March 13.

My dear Sharp: Lay out depreciation and values in the Glades. For nearly 10 years I have been betting my little farm would eventually become such a good thing as to suffer, because of money that is not to make money. This betting has cost me not only sold dollars but a lot of myself. The total is more than the \$40 per acre your paper says and can be bought for in the north. I had near a good road that will produce 300 bushels of potatoes to the acre. My potatoes seldom less than \$1 the bushel your article believes it.

Agricultural land in sections of country is selling for \$200 to \$300 per acre. I am still betting on the Glades and all of sympathy with a paper that covers my lot.

Yours, H. H. HAYNES.

Do as you please with enclosed check, but keep the paper coming.

Yours, H. H. HAYNES.

Editor Everglades News:

As one of your subscribers interested in flood control and the building of a cross-state canal, I have read with much interest the references in this connection to the fact that Florida failed to elect Mr. Hoover and I wanted to see what you said in your last issue as to the introduction by Representative Peoples of Glades county, of an act to change the name of the drainage district to that of the Hoover-Spencer Drainage District.

Will you allow me to suggest the possibility that such a proposition or even public discussion of it, might not be a good thing for the district? I suggest this for your consideration and if you shall not agree with me after reflecting about it, the suggestion can do no harm. I have been a rather heavy taxpayer in Henry county for nearly a quarter of a century and a small taxpayer in Glades county for about 10 years; and I have seen and suffered from the floods, both directly and indirectly. In addition to injury to lands and great depletion in values caused by overflows, my smaller home has been flooded more than once, and one time practically all of my furniture and household goods were ruined by the water. I had almost despaired of relief until the pending proposition for flood control by the Federal Government revived my hopes.

President Hoover undoubtedly has interested in that section and it was a great help to have him go through there to investigate for himself. It looks much like we are at last in sight of our only real chance for flood control and a cross-state canal, unless some mistake is made.

But Mr. Hoover, I am sure, is not a coarse grained politician. Evidently he is a man of refined feelings. Whilst no doubt the fact that Florida failed to elect him, naturally makes a soft spot in his heart for the state, I must respectfully submit, he is unlikely to have it believed that he would put his hand into the Federal Treasury and money in Florida for flood relief for political reasons. It would be a shocking breach of his high trust and he can not possibly feel that he is at any effort to make the public believe that he would help Florida.

Ida as a mere "pork-barrel" proposition.

I am perfectly sure that we have a splendid case on its merits, and that Florida is entitled to every consideration that should be afforded by the Federal Government; and the fact that Florida failed to elect Hoover will help just as much as it should help within the bounds of good taste and honest opinion. I am sure that the fact that Hoover should not and can not properly give and any public discussion of such an aspect of the question is more apt to disgust the president and hurt our cause than it is to help it.

The suggestion by the chairman of the flood control committee of congress, that the name be changed, was a mere ploy; and I have no doubt on reflection, the chairman himself would consider it a poor idea in view of the publicity given it. He would have no idea of anybody seriously considering such a proposition. I am an independent republican who was glad to vote for Hoover, and as already indicated, I am not interested in the present project for the Federal Government to control the flood waters of Lake Okechobee and build a cross-state canal, but I should be very glad to feel that President Hoover is only a politician as to be pleased with the prospect of changing the name of the Everglades Drainage District, as proposed.

I have just this week talked to an old friend congressman of mine from the far West (Butler or Cronin), who promised me that he would enthusiastically do everything he could for flood control in Florida. I have not yet seen any legislation (Mr. Hoover), but he is an influential congressman with whom I am on good terms, and I am sure that he will do everything in his power to help. I have seen it suggested that everybody interested down there should get in touch with congressmen and senators of their acquaintance, and I am acting on that idea as a good one, and believe it would be worth while to get as many as possible to follow it.

Very respectfully,  
H. H. HAYNES.

## HOW TO MEET THE DEFICIT

Tampa Morning Tribune.

A statement issued from Tallahassee says there is a deficit of \$200,000 a month in state tax collections, which is interpreted as proof that the present system of taxation is "breaking down." With this condition as a basis, bills are being prepared and constitutional amendments are suggested to relieve the situation.

The reason for the deficit in tax collections is the failure or refusal of holders of large acreage to pay their taxes. They permit their land to be sold for taxes and then attempt to make compromises with the officials whereby they hope to be relieved of a large proportion of the amounts due.

A deficit of \$200,000 a month means a deficit of \$2,400,000 a year. The state's expenses are now approximately \$400,000 a year. A reduction of only six per cent in these expenses would take care of the entire deficit. This is the remedy, and the only reasonable and safe remedy. A six per cent reduction is easy. Governor Carlson has already taken action to effect economies which will approximate this reduction. With the aid of the legislature, he can reduce state expenses fully 25 per cent. In doing this, the state would only be adopting the policy which has been forced by conditions upon individuals and upon private enterprises.

The movement for a change in the tax system and for devising other means of revenue is being actively and busily agitated by holders of acreage and large real estate operators who desire that the state adopt some form of taxation which would relieve them of the payment of taxes and make other taxpayers pay the expenses of the state.

The people of Florida should not be called upon at this time to pay any additional, any new taxes, instead of new sources of revenue, which will excessively tax those who are not contributing the bulk of the state's income. Florida needs a reduction of expenses—not only state, but county and city.

Taxpayers in the various counties and cities of this state are now paying from 50 to 400 mills in taxes. Besides this, they are paying special

taxes on their occupations, their automobiles. These forms of taxation should not be increased—and no new forms should be created.

The state, the county, the city, must adopt the policy of private business—and cut its expenses to meet its income.

Miss Eunice Swicord, the second grade teacher, has returned from the hospital in West Palm Beach. Her tonsil operation was a success and she is now teaching, having relieved Eva Erickson, who was substituting for her.

3 Symbols of a Great American Industry

While cinders are useful in their place, no railroads have been built primarily to produce cinders. But it was only a few years ago that gasoline, then a by-product of kerosene manufacture, went begging in the fange way cinders do now!

Quick changes often make by-products into main products, and vice versa. The truly fortunate industry is the one having an immediate cash market for all its products, especially where one or more of the products enjoy the protection of patents.

The undersigned companies are engaged in domestic cane sugar growing on a large scale. They are convinced of the great need for a large production of sugar within the continental borders of the United States. They know such an industry can be made to pay a satisfactory return on the investment and to insure the country against bad shortages.

These companies are also in the fortunate position of having a cash market for all their by-product, bagasse, the shredded sugar cane that comes out of the extracting mills. Bagasse is the material used for making Celotex insulating board in its various forms. Celotex mills are turning out 300 million feet a year of building board, roof insulation, refrigerator linings, lath and carpet linings. Wherever a material is needed to stop the passage of heat and cold or to deaden sounds, Celotex is found highly effective and economical. Result: in seven short years, the creation of a huge and rapidly-growing industry, now being coordinated, whose products meet vital needs of the people in two directions, without economic waste.

An illustrated booklet telling more about these companies will be sent upon request.

# NEWS FROM AROUND THE BIG LAKE

## OKEELANTA

March 18, 1929.

On the 11th inst. a car occupied by five visitors drove in from Sebring. B. F. Latham from that town was at the steering wheel, the others were Mr. and Mrs. W. N. White from Newcastle, Pa., and Mr. and Mrs. Matt Robertson from Sharon, the same state. The party was inquiring about a 100-acre tract in section 2 on south side of Belle Glade owned by one of them.

The Norton family, having spent a few days with relatives in La Belle, returned last Wednesday to their present home on the Frans ranch.

Peter Kuntion is busy building a house on his two lots north of the store. The hurricane didn't respect the property rights of this Montana pioneer, but he did save his life.

The home of the Ajimajims is once more tenanted by the family. They vacated the Red Cross tent at South Bay last Saturday.

The recent visit by Willard Smith, county commissioner from this district, was much appreciated; especially gratifying in that he had assurance of a large, a long lot used by the settlers and residents on all sides of the two families—North New River and Bolles' Up to date they were forced to all kinds of slow and dangerous makeshifts in using tractors, implements and produce from one side to the other. During the 12 years of constant residence in this correspondent's opinion, the request made by our community to the county board has been unreasonable or above what we were justly entitled to.

Geo. Graham and Dave Hetherington called on their old friends, Newhouse and Cavell, at the Brown Co. farm last Sunday. The weather, however, was unfavorable for an enjoyable outing; the afternoon rain was needed, though. Building material was difficult to obtain at the Adam's place north of town; and a house for Thigpen was under construction. The latter is farther north, fronting the public highway which has not been made passable last week.

Last week's News did not reach us on Saturday.

## Stocking Bass, Perch In Fisheating Creek

A good work is being done this year in Fisheating creek, where all catfish, gars and "blue" fish are being taken out and destroyed and being brought in and bass put in the creek. They are being stocked in the creek, and it is hoped that they may live, do well and multiply without let or hindrance, to the end that Fisheating creek may again deserve the reputation of being the best fishing stream in the world.

## TUNG TREES ON LAKESHORE LAND

Moore Haven, March 17.—A. J. Matthews of Sebring, manager of the Lakemont Farms development at Lakemont, was in town Tuesday and told of the purchase of several tons of tung oil tree seed which will be planted in the future. The plan is to plant the basis of a large tung oil nursery.

Mr. Matthews believes much of the land belonging to his company particularly suited to the production of tung oil and will plant many acres as soon as the trees can be developed in the nursery which is now not give the results of its present making experiments in its production and this year are grinding their first crop and will be better able to determine its success.

## NATIONAL BANK AT MOORE HAVEN

A national bank may be established at Moore Haven, county seat of Glades county, which has been without a bank for more than a year. The Glades County Democrat in its issue of March 15 says a bank examiner was at Moore Haven last week looking over the field and getting information on which to recommend or not to recommend the granting of a charter. The article also says that the bank is the applicant for a charter.

About seven years ago Moore Haven had two state banks. That was about the time the county was organized by detaching a portion of DeSoto county. Both banks failed; the failures being due to a fire, the 1922 flood and poor loans. Another bank was organized and it failed when the Williams system collapsed. A good deal of the credit was lost when the Williams system collapsed.

Mr. Everett is experimenting with a six-acre field of beans just south of town, putting on commercial fertilizer. Another sale of lots this week was made when the Kilgore Seed Company bought 100 acres of land on the corner of Main street and C avenue. The company expects to build soon.

Mr. and Mrs. J. R. Alston, of Clewiston, were week-end visitors with their former brother, K. C. Alston of this place.

Mrs. Donald Ferguson entertained Mr. and Mrs. C. D. Helm with a 6 o'clock dinner Friday evening.

The Women's Club met Wednesday in the community hall. The subject for the day was, "Federation and What It Means." Mrs. Brodwin was in charge of the program.

Messrs. Donald Ferguson and Charles W. Ferguson left Tuesday morning for DeLand, where they were called by the illness of their mother, who spent the winter in that place.

Word has been received from Mr. and Mrs. Evans, who were called to Herk, Ill., by the very serious illness of their son, that the son is much better and that they expect to return soon.

The county is building a house for the bride, Mrs. Evans. It is built on the canal bank near the bridge, where workmen are digging down to rock for the foundation.

Miss Howell, the county nurse, visited the school last Thursday. The children were measured and weighed and their throats examined and otherwise looked over. Very few were found to be under weight. Those who need medical treatment were advised accordingly.

Carpenters have been busy finishing up things around the school building. The screens were changed so as to be fly-proof. Screen doors put in, more seats placed and shelves built.

George Benton, coming from Fort Myers schools, was enrolled in the Belle Glade school this week. He entered the seventh grade. The school now has an enrollment

## BELLE GLADE

By Gerrit Koyker.

Dr. Garth, the district superintendent of the M. E. church, and Bishop Kenney were in Belle Glade on Monday afternoon, conferring with local Methodists in regard to a church building and the program of work for the coming year. They went from there to South Bay for another meeting, returning to Miami in the evening. Rev. Hook, the local pastor, returned with them in order to visit with his family the rest of the week.

The town committee on school building, headed by Mayor Grier, met Monday evening in the town hall. The town is urging the school board to build the new school for a summer high.

Just look at our town looking sooming out! Beautiful palms have been planted all along Main street between the curb and the walk and on both sides of the street. The hills which are to be planted along the canal and will be planted in the coming Tuesday.

Avenue will also have them.

C. B. Greening, a builder of some note and who has property in other places in Florida, bought a lot this week where he will build a billiard parlor. The lot is situated just south of the Denton property on Main street.

Dan Cooper, who runs the American Cafe, has been in Okeechobee for a couple days, returning Tuesday in a big Mitchell car.

Mr. Everett is experimenting with a six-acre field of beans just south of town, putting on commercial fertilizer.

Another sale of lots this week was made when the Kilgore Seed Company bought 100 acres of land on the corner of Main street and C avenue. The company expects to build soon.

Mr. and Mrs. J. R. Alston, of Clewiston, were week-end visitors with their former brother, K. C. Alston of this place.

Mrs. Donald Ferguson entertained Mr. and Mrs. C. D. Helm with a 6 o'clock dinner Friday evening.

The Women's Club met Wednesday in the community hall. The subject for the day was, "Federation and What It Means." Mrs. Brodwin was in charge of the program.

Messrs. Donald Ferguson and Charles W. Ferguson left Tuesday morning for DeLand, where they were called by the illness of their mother, who spent the winter in that place.

Word has been received from Mr. and Mrs. Evans, who were called to Herk, Ill., by the very serious illness of their son, that the son is much better and that they expect to return soon.

The county is building a house for the bride, Mrs. Evans. It is built on the canal bank near the bridge, where workmen are digging down to rock for the foundation.

Miss Howell, the county nurse, visited the school last Thursday. The children were measured and weighed and their throats examined and otherwise looked over. Very few were found to be under weight. Those who need medical treatment were advised accordingly.

Carpenters have been busy finishing up things around the school building. The screens were changed so as to be fly-proof. Screen doors put in, more seats placed and shelves built.

George Benton, coming from Fort Myers schools, was enrolled in the Belle Glade school this week. He entered the seventh grade. The school now has an enrollment

of 64 with an average daily attendance last month of a little over 45. If nothing interferes this month, that daily average will be raised considerably this month. The primary room alone has had an attendance lately of 30 or more.

The school has got down to a real working basis. There are a few still who are not applying themselves, but these will have to be placed back with the others will be promoted.

## Officers Transfer Laborers To Jail

Deputy sheriffs from the county arrested negro resort Saturday night. The Palm Beach Post of Tuesday this reports the disposition of the cases of the arrested persons:

"All of 33 were in the jail Monday morning. Sheriff Baker received today and in lieu of \$50 bond, Sheriff Baker had received to many complaints from the residents of the Glades and there had been at least one killing in a 'jook' in the last two months, that he failed to hear down a little on the liquor, gambling and pistol-toting crowd frequenting the places, it was at his office Monday. Deputy Sheriff Elmer Padgett, Joe Padgett, W. H. Lawrence, Barney Saxe and Ned Harkness, and J. T. Lawrence made the raids. At one place when they entered there was a clatter of beds on the floor and after the flash-spent weapons were picked up."

## CHARGE ATTORNEY TRIED TO DEFAUD RED CROSS

The preliminary hearing of A. H. Thompson, Lake Worth attorney, charged with defrauding the American Red Cross, was continued until the matter of the Estate of Isaac W. Leatherman, deceased.

Richardson Monday at West Palm Beach on account of counsel. Shoup was also on the stand, although not by S. D. Hough, Lake Worth politician, who represented in recent shooting case when Hough was accused of aggravated assault.

In the Court of the County Judge, Palm Beach County, Florida, the matter of the Estate of Isaac W. Leatherman, deceased.
